

College or Career & You

The goal of high school is to ensure all students graduate college and career ready. College and career readiness not only refers to the academic content, knowledge, and skills high school graduates must have, but also the acquisition of essential skills and experiences that are necessary to be successful in life. Booker High School's goal is simple - all Booker High graduates will be prepared for postsecondary education and/or training and will have the skills needed to pursue options and opportunities in the job market.

Our College or Career & You Program will be grounded in college and career readiness standards

Our student's College or Career & You portfolio will include relevant grade-by-grade learning expectations and milestones

Our College or Career & You Program's best practices include activities, strategies, and information that align with the standards and expectations of today's colleges and universities, and our world's businesses and industries

Our College or Career & You Program's curriculum comprises concepts and models used by My Career Shines, Overgrad, The Department of Education, and our school district's Career Research & Decision Making course

Our College or Career & You Program will utilize the resources of stakeholders and partners such as The Education Foundation, The Gamma Xi Boule Foundation, The Gulf Coast Community Foundation, The Sarasota Community Foundation, and CareerSource Suncoast
